## INTERNATIONAL SEARCH REPORT

International application No.

PCT/AU2004/000123

A.							
	CLASSIFICATION OF SUBJECT MATTER						
Int. Cl. 7:	C07C 35/37, 13/547, A61K 31/015, 31/047, A61L 2/18, A61P 31/04, 33/02						
According to	International Patent Classification (IPC) or to both national classification and IPC						
В.	FIELDS SEARCHED						
Minimum docu	mentation searched (classification system followed by classification symbols)						
Documentation	searched other than minimum documentation to the extent that such documents are included in the fields search	ed					
	<u> </u>	·					
Electronic data Chemical Al	base consulted during the international search (name of data base and, where practicable, search terms used) ostracts: substructure based on compounds P, Q and R; and keywords based on trinervitane						
C.	DOCUMENTS CONSIDERED TO BE RELEVANT						
Category*	Citation of document, with indication, where appropriate, of the relevant passages						
A	WO 2001/090035 A1 (COMMONWEALTH SCIENTIFIC AND INDUSTRIAL RESEARCH ORGANISATION) 29 November 2001 See whole document	1-28					
A	Chemical Abstracts, abstract number 120:270877; Hirukawa T et al: "First synthesis of the trinervitane system from secotrinervitane by transannular ring construction" (& Journal of the Chemical Society, Chemical Communications (1994), (3), 311-12)  A  See abstract and formula I						
	Further documents are listed in the continuation of Box C X See patent family annual	ex					
* Special	categories of cited documents:  mt defining the general state of the art which is "T" later document published after the international filing date or presidered to be of particular relevance conflict with the application but cited to understand the princip	riority date and not in					
* Special "A" docume not con:	categories of cited documents:  int defining the general state of the art which is sidered to be of particular relevance  application or patent but published on or after the international filing date or proposed in the principal state of the art which is sidered to be of particular relevance  application or patent but published on or after the international filing date or proposed in the principal state of the international filing date or proposed in the principal state of the international filing date or proposed in the principal state of the international filing date or proposed in the internation	riority date and not in le or theory be considered novel document is taken					
* Special docume not con: "E" earlier a internat "L" docume or when	categories of cited documents:  Int defining the general state of the art which is sidered to be of particular relevance  Interpolication or patent but published on or after the cited to understand the princip underlying the invention document of particular relevance; the claimed invention cannot or cannot be considered to involve an inventive step when the constant of particular relevance; the claimed invention cannot or cannot be considered to involve an inventive step when the document of particular relevance; the claimed invention cannot involve an inventive step when the document is combined with such documents, such combination being obvious to a person sentence.	riority date and not in le or theory  be considered novel document is taken  be considered to one or more other					
* Special docume not con:  "E" earlier a internat  "L" docume or whic another  "O" docume or other	categories of cited documents:  mt defining the general state of the art which is sidered to be of particular relevance  application or patent but published on or after the cited to establish the publication date of relation or other special reason (as specified) and referring to an oral disclosure, use, exhibition  "T"  later document published after the international filing date or proceeding to underlying the invention document of particular relevance; the claimed invention cannot involve an inventive step when the document is combined with such documents, such combination being obvious to a person service.  "E"  later document published after the international filing date or proceeding to understand the princip underlying the invention document of particular relevance; the claimed invention cannot involve an inventive step when the document is combined with such documents, such combination being obvious to a person service.  "E"  document of particular relevance; the claimed invention cannot involve an inventive step when the document is combined with such documents, such combination being obvious to a person service.	riority date and not in le or theory  be considered novel document is taken  be considered to one or more other					
* Special docume not con:  "E" earlier a internat  "L" docume or whic another docume or other  "P" docume	categories of cited documents: mit defining the general state of the art which is sidered to be of particular relevance application or patent but published on or after the cited to establish the publication date of citation or other special reason (as specified) art referring to an oral disclosure, use, exhibition armeans ent published prior to the international filing date art than the priority date claimed  "T"  later document published after the international filing date or priconflict with the application but cited to understand the princip underlying the invention of particular relevance; the claimed invention cannot or cannot be considered to involve an inventive step when the document is combined with such documents, such combination being obvious to a person such document member of the same patent family	riority date and not in le or theory  be considered novel document is taken  be considered to one or more other					
* Special docume not con:  "E" earlier a internat  "L" docume or whice another docume or other  "P" docume but late  Date of the act	categories of cited documents:  Int defining the general state of the art which is sidered to be of particular relevance  Implication or patent but published on or after the sinual filing date or particular relevance in this cited to establish the publication date of relation or other special reason (as specified) and referring to an oral disclosure, use, exhibition retains that completion of the international filing date and completion of the international filing date and completion of the international search is cated to establish the publication date of retain the priority date claimed invention cannot involve an inventive step when the document is combined with such documents, such combination being obvious to a person such document member of the same patent family  Date of mailing of the international search report	riority date and not in le or theory  be considered novel document is taken  be considered to one or more other killed in the art					
* Special docume not con:  "E" earlier a internat  "L" docume or whice another docume to other me docume but late  Date of the act  9 March 20	categories of cited documents: mit defining the general state of the art which is sidered to be of particular relevance application or patent but published on or after the since the which may throw doubts on priority claim(s) the is cited to establish the publication date of citation or other special reason (as specified) and referring to an oral disclosure, use, exhibition are research published prior to the international filing date are than the priority date claimed  The conflict with the application but cited to understand the princip underlying the invention document of particular relevance; the claimed invention cannot involve an inventive step when the document is combined with such documents, such combination being obvious to a person sent published prior to the international filing date are than the priority date claimed  The categories of cited documents  "X"  later document published after the international filing date or princip underlying the invention  document of particular relevance; the claimed invention cannot involve an inventive step when the document is combined with such documents, such combination being obvious to a person sent published after the international filing date or princip underlying the invention  document of particular relevance; the claimed invention cannot involve an inventive step when the document is combined with such documents, such combination being obvious to a person sent published prior to the international filing date  The conflict with the application but cited to understand the princip underlying the invention  The conflict with the application but cited to understand the princip underlying the invention  The conflict with the application but cited to understand the princip underlying the invention  The conflict with the application but cited to understand the princip underlying the invention  The conflict with the application but cited to understand the princip underlying the invention  The conflict with the application but cited to understand the princip underl	riority date and not in le or theory  be considered novel document is taken  be considered to one or more other killed in the art					
* Special "A" docume not con: "E" earlier a internat "L" docume or where another "O" docume or other "P" docume but late  Date of the act 9 March 20 Name and mai	categories of cited documents:  mt defining the general state of the art which is sidered to be of particular relevance  application or patent but published on or after the fional filing date  mt which may throw doubts on priority claim(s) this cited to establish the publication date of citation or other special reason (as specified) ent referring to an oral disclosure, use, exhibition remains ent published prior to the international filing date are than the priority date claimed  Mathorised officer  "T"  later document published after the international filing date or proconflict with the application but cited to understand the princip underlying the invention  document of particular relevance; the claimed invention cannot involve an inventive step when the document is combined with such documents, such combination being obvious to a person such document member of the same patent family  Date of mailing of the international search report  Authorised officer	riority date and not in le or theory  be considered novel document is taken  be considered to one or more other killed in the art					
* Special "A" docume not con: "E" earlier a internat "L" docume or whic another "O" docume or other "P" docume but late  Date of the act 9 March 20 Name and mai AUSTRALIA PO BOX 200,	categories of cited documents: mit defining the general state of the art which is sidered to be of particular relevance application or patent but published on or after the since the which may throw doubts on priority claim(s) the is cited to establish the publication date of critation or other special reason (as specified) and referring to an oral disclosure, use, exhibition are means ent published prior to the international filing date are than the priority date claimed that completion of the international search  O4  Ling address of the ISA/AU  It is cited to establish the publication date of critation or other special reason (as specified) and comment of particular relevance; the claimed invention cannot involve an inventive step when the document is combined with such documents, such combination being obvious to a person sent published prior to the international filing date and the priority date claimed  Date of mailing of the international search report  Authorised officer	riority date and not in le or theory  be considered novel document is taken  be considered to one or more other					

## INTERNATIONAL SEARCH REPORT

Information on patent family members

International application No. PCT/AU2004/000123

This Annex lists the known "A" publication level patent family members relating to the patent documents cited in the above-mentioned international search report. The Australian Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
